

Separation Is A Must

By Elijah Muhammad

Messenger of Allah

Why not a united Black Nation? Have the white people not been a united white people all their days? Have they not lived in their own quarters and countries under their own white rulers, kings, queens, and presidents?

What is all the excitement over the Black Man wanting to live to himself? We have lived under segregation forced upon us up until today. Now, why think living apart, out of the white man's society, is something that we should not think about doing?

Black people and white people are used to living apart from each other. It is the nature of us both and we are better off living apart than trying to mix together (which is against the nature of Black and white). We are two different people.

Black ants do not try living with red ants, white ants, or any color but their own color. Even black birds will not try mixing with yellow, red, and white birds. Everything abides by the law of nature in which it was created but the white man and his Black slave.

White people want to mix with every color of people on the earth. And, they have nearly mixed up the entire population of the earth in various colors. They did not want to destroy their color. They do not even want to destroy it today but they want to force their color into other people.

Now, many of the Black slaves desire to live with their Black selves, after living under a forced mixture of our slavemaster's children.

Now, today, the very nature of us is being taught by God, Who Knows all of us. This teaching of self from God makes us desire, as never before, to be ourselves.
