Muhammad on: Humans or Animals?

By Elijah Muhammad

Messenger of Allah

We may well ask ourselves the question—are we really humans or animals? — because we are not acting like civilized human beings. We are acting like savage animals—beasts. Stop and think to yourself (or with others) what the Black man of America looks and acts like.

GOD STANDS, as it is written in the Scripture, with outstretched arms, inviting us to come to Him to save us out of a world that is destroying itself; a world to which we actually never have belonged.

He wants to redeem — reclaim—us from our open enemies here in North America, whose fathers bound us in chains and brought us to these people (white people of America) to suffer at their hands until this day when the hand of Almighty Allah, in the Person of Master Fard Muhammad, is outstretched to us to save and deliver us from that which we have been begging every power on earth and in heaven (if they would listen to us) to deliver us from for 400 (four hundred) years.

NO GOD ever answered our cries until the coming of God, in the Person of Master Fard Muhammad, to Whom praise is due forever. He of-

fers to sit us in heaven at once.

Shall we accept heaven or hell? Shall we act like civilized beings in accepting the inviting call of the All-Wise Supreme Being or shall we reject His call to accept an uncivilized call from the jungles of evil, filth, trouble, poverty, want and destruction?

CIA Scheming in Africa Nations

(Pan African Congress)

CAIRO, Egypt—A radio commentator here declared that America's spy organization, the Central Intelligence Agency (CIA) has schemes going detrimental to three African countries—the Sudan, Algeria and Nigeria.

SEEKING to divide a troubled Nigeria and insure cheap oil supplies to the United States, the CIA, it was reported, has financed a number of arms deals in the country.

Its activities in the Sudan are designed to bring about the overthrow of that country's present regime. The commentator said aircraft had been seen over Algeria photographing airfields and other strategic areas in the Sahara.
