On Life In The Sudan

By Bayyinah Sharrieff

I have lived and studied abroad three years. Two years in the Sudan, Africa, and one year in Europe. During most of this time, I was looking for a program which my own Black kind could implement in America for an effective development into a status to be respected by all.

IN MY SEARCH, it was not until I reached Aseda, Sweden, that I became aware of the Honorable Elijah Muhammad's program, and in Paris, France, that I read of and met his followers, that I knew this to be the program for the development of my own Black kind in America.

Through all of my searching, I know that Muhammad's program surpasses all that I saw in the Sudan and elsewhere. Yet, when I returned to America to participate in this program, I found the majority of my people ignoring this great program and opportunity with the Honorable Elijah Muhammad. This is a pity.

The government of America has no program to gain you world respect nor benefit for your Black self and your Black kind. I am sorry to see you all looking for employment from white America, when daily the American news media reports unemployment increasing.

Make your own jobs, do something for self.

Look at what the Honorable Elijah Muhammad has done with his poor followers. It takes a long time for poor people to save their pennies, nickles, and dimes to get thousands, and hundred's of thousands of dollars not to even mention millions.

Yet the followers of the Honorable Elijah Muhammad can proudly boast of an eight million dollar debt clear property and business establishments. This is a great achievement with poor people.

Think of what more could have been done if some of the wealthy and rich of our Black kind had joined Messenger Muhammad. Yet their hesitation to support Muhammad's program will not and cannot stop the full development of his program, for it is divinely supported. I just feel sorry for them for the terrible consequences which are prophesied to fall on the rejectors of Muhammad's program.
