

Women In Islam

By Tynetta Deanar

The Christian and Western world have so distorted the spiritual teachings and traditions of Islam that it is a wonder how the Muslim world can profess open friendship with these enemies of their religion.

WHEN ONE considers, for example, the majority of Christian and Western writers continuously distort even the name of this great religion and persist in teaching others to imitate the same errors, even though the Muslim scholars and believers never use the false terms now in modern use, it is a great display of patience by the Muslims in general.

The efforts of some members of the Islamic world to convert this hard, unyielding race of people to Islam will receive no greater rewards than was the case of the Divine Prophets of God during the past 6,000 years.

Europe and the entire Western civilization, in spite of the work of the prophets among this people, took the artificial light of Christianity and carried it boldly to all parts of the world to deceive the people of all nations into believing that this false doc-

trine was the true spiritual light of God and the world.

ACCORDING to the teachings of Messenger Muhammad, this race of Europe only attained this monstrous power because the true and living God gave this world into the hands of the devil that he might work his corruption by land and by sea to fulfill the work of Satan as is so vividly described throughout the Bible.

Almighty Allah permitted this evil race to multiply and dominate the world for a brief period of 6,000 years.

If the entire Islamic world fails to listen to these most enlightened words, teachings and warnings of Allah's Messenger Muhammad in America today, they will suffer great and terrifying consequences in the days ahead.

THE POOR BLACK man of America, now at the bottom rung of civilization, is most certainly destined to reach the top. The hatred of the world, in regard to the future of the black man, is not equal to the hatred of God towards this world who has rejected His very own who were the first in His creation.
